

KROON ANIMO - SNEAKERS

MEASURING YOUR FEET

Our sizes are unique and entirely specific.

Use the size chart assigned to the chosen product type (chart below).

Measure your foot size wearing the type of socks you plan to wear inside the KROON sneakers.

Ideally, measure your foot size in the afternoon (your feet usually grow wider during the day).

Balance your entire weight equally on the prepared paper for measuring.

STEP 1

- Place the sheet of paper on a smooth surface beside a straight wall - we recommend that you fix it in place so that the sheet will not move.
- Place your left foot on the paper with the heel directly against the wall.

STEP 2

- Draw the precise outline around your left foot.
- Do the same with your right foot (very important, since the left and right feet could have different sizes).

Caution! Make sure that the pencil is exactly perpendicular to the paper while outlining!

STEP 3

- With a ruler, measure the length of the foot - measuring the LONGEST distance between two points (usually the distance from the heel to the big toe).

NOW YOU MAY COMPARE YOUR SIZE TO OUR SIZES EXPRESSED IN CM

The lengths of your feet could differ from each other. In this case, for determining your foot size choose the larger foot.

We recommend that your shoes are around 0.5 cm longer than your foot length.

FIND YOUR KROON SIZE

Using your measurements and our size chart below, find out the right size for your shoes.

US MEN	US WOMAN	UK	EUR	insole cm
2	4	2	33	21,4
3	5	3	34	22,1
4	6	4	35	22,8
5	7	5	36	23,4
6	8	6	37	24,1
7	9	7	38	24,7
7,5	9,5	7,5	39	25,4
